

Retail Store Systems & Solutions

“Hardware, software and services to streamline operations and connect with customers.”

Integrating people, process and IT.

RPE, IBM and JDA: A winning combination in Point-of-Sale

RPE provides retail hardware, software and the necessary personnel to support store systems. RPE is not a software vendor, but has established relationships and works in unity with industry-leading software and hardware providers.

In fact, RPE can orchestrate the final masterpiece, providing objectivity and ensuring desired performance from store systems:

- Discovery, requirements gathering and business process improvement analysis
- Software and hardware evaluation and selection
- Gap analysis
- Project management and implementation
- Design and customization
- Implementation and deployment
- Training and documentation
- Store systems level 2 and level 3 support

Certified for IBM Retail Store Solutions

IBM's unmatched Point-of-Sale market leadership together with RPE's retail systems expertise is a winning combination to help stores increase sales and reduce costs. As a Certified IBM Retail Store Solutions Business Partner, RPE can provide all the necessary steps for your POS store solution. We'll help you make the right decision when it comes to hardware, software and services.

- Maximize performance, manageability and reliability
- Enhance the customer experience
- Increase employee productivity and efficiencies
- Utilize existing software or migrate to new solutions

Innovative IBM Technology

Each of the IBM POS systems offer unique features while providing scalable designs that help retailers operate efficiently as the business grows. The IBM POS solutions are for retailers of all sizes who demand maximum performance and adaptability. Retailers meet consumer demands for fast, accurate transactions with systems designed to enhance the customer experience and improve operational efficiency.

Reliable JDA Software

JDA Software has leveraged years of Point-of-Sale and merchandising system experience to create a POS application that delivers deep functionality to make stores part of the entire retail enterprise system. Store associates perform basic point of service functions in a fast, easy and truly unique user interface. Stores can connect real-time to share information in merchandising, labor, space and floor planning and customer relationship systems.

For operating in a Windows-based distributed store systems environment, JDA offers Win/DSS – the original in-store system relied upon by hundreds of retailers worldwide.

- Enterprise class POS system
- Affordable
- Easy to install and maintain
- Easily modified to meet needs
- Reliable
- Easy cashier training
- Fully integrated with JDA MMS
- PCI compliant
